

# Broadband Fixed Wireless Internet

## What is it?

A Layer-3 shared fixed wireless shared service offering asymmetrical speeds.

Broadband does not come with SLAs and monthly data limits may apply.

## Use cases

Broadband is best when:

- Business has budgetary constraints
- Internet speed can fluctuate with minimal impact on business activity
- Download speeds are more important than upload speeds

## Benefits

- Budget-friendly
- Not paying for upload speeds that business doesn't need
